Education

Bachelor of Engineering, Chennai Institute of Technology
Computer science and Engineering (Cyber Security)

09/2025 – Present

INTERNSHIP EXPERIENCE

DevOps & Cloud Engineering, SBV Technologies Pvt Ltd

05/2026 – 07/2026 | Chennai,India

- Designed, deployed, and managed cloud infrastructure using **AWS services** such as **EC2, S3, IAM, and RDS**.
- Assisted in implementing **CI/CD pipelines** and automated application deployment to improve development and release efficiency.
- Monitored, maintained, and optimized cloud-hosted applications, ensuring high availability, security, and performance.

Full Stack Intern, Neural Transformers.AI

09/2023 – 11/2023 | Chennai,India

- Built and deployed NeuralTransformer.ai's official website as a full-stack developer.
- Implemented a fully functional online course platform with responsive, secure, and scalable architecture.
- Collaborated on real-world workflows, enhancing skills in modern technologies and deployment.

Projects

NeuralTransformer.ai Website, CSS,JavaScript,AWS,VEED.IO,PHP,Razorpay

09/2023 – 11/2023

- Developed the official company website using PHP, JavaScript, HTML, CSS, and AWS.
- Integrated Razorpay payment gateway and online course management.
- Deployed and maintained production-ready web applications.

Digital Twin For Turbojet engine, Python(Pytorch,LSTM,Random Forest,CNN) , Blender,Unity,Java Script,HTML

07/2026 – Present

- Developed an AI-based Digital Twin for a turbojet engine as part of an industry project at Hindustan Aeronautics Limited (HAL).
- Implemented LSTM, CNN, and Random Forest models for engine health monitoring, anomaly detection, and predictive maintenance.
- Processed and analyzed engine sensor data using Python and PyTorch to support predictive analytics.
- Built a 3D digital twin model using Blender and Unity for engine visualization and simulation.
- Developed a web-based dashboard using HTML and JavaScript to display engine parameters and AI-generated insights.

MediQue – Smart Healthcare Queue Management Platform 

10/2025 – Present

HTML,CSS,JavaScript,Firestore,VOIP,Socket.io,Flutter,React.js,Node.js,Express.js,Git,REST API

- Developed **MediQue**,full-stack healthcare queue management system using **Flutter, React.js, Node.js,HTML,Tailwind CSS** and **Socket.io**
- Implemented **real-time queue tracking,AI-based wait-time prediction,QR check-in**, and **push notifications** to optimize patient flow.
- Built **role-based dashboards**, secure authentication, and analytics for patients, doctors, receptionists, and administrators.

Skills

Programming Languages

- Python
- C++
- C
- SQL
- JavaScript

Development Frameworks

- Flutter
- React.js
- Node.js
- Express.js
- HTML

Development Tools

- **AWS** (EC2, S3, IAM, RDS)
- Git
- GitHub
- CI/CD
- MySQL Workbench

Cybersecurity

- Network Security
- Penetration Testing
- Vulnerability Assessment
- Nmap
- Wireshark

Certificates

- Professional Certification Program in Computer Science Engineering by iHUB DivyaSampark - IIT Roorkee.
- Python Essentials-Cisco
- AWS Essentials

Achievements

- Second Runner up in National Level Hackathon(SRM)
- Winner – State Level Hackathon (Chettinad Vidyashram School)
- **Selected as a Finalist** in the **National Level Hackathon** organized by **Rotary International**.
- **Secured 7th Place** in a **National-Level Capture The Flag (CTF)** cybersecurity competition as part of a team.
- Top 25 **Finalist** from 2500+ participants in the National level hackathon conducted by **Hindustan Aeronautics Limited (HAL)** and **IIT Indore**
